designfire

We took on the challenging task and went beyond all the established boundaries to design fire like never before. It was difficult but we managed to develop solutions that allowed us to arrange natural fire in spaces you would not imagine, be it indoor or outdoor.

As the only company in the world we give you fully automatic fireplaces that guarantee convenience and safety. We carefully listen to our clients giving individually customized products. Our offer covers unique bioethanol and gas technologies that provide a lot of freedom in designing your perfect space with fire as the focal point.

The recognition says it all. Planika is global. With official subsidiaries in Europe, USA and Asia and an extensive distribution network we are present in over 100 countries around the world. But the success also lies in the concept of teal organization that Planika adopted. At the company there is no hierarchy and all the employees manage themselves to have freedom and a real influence on the products we create.

This made it possible to give you truly unique solutions in fire design.
This is the work of all of us.
